TO THE HONORABLE THE COLONIAL SECRETARY.

Legislative Council Office, Hobart Town, 16th July, 1874.

SIR,

I HAVE again, in the discharge of my duty as Government Statistician, to forward to you the Annual Statistics of this Colony; the present volume containing those of 1873.

Before proceeding to summarise the results of the returns forming this volume, it seems to me that some reference is demanded to the Resolution of the Representatives of the different Colonies adopted at their meeting at Sydney held in the early part of 1873. That resolution was to the effect, that "With a view to facilitate comparison between the official Statistics of all the various Australasian Colonies, it was resolved by the Conference that it is expedient to have all such Statistics framed, as far as possible, upon a uniform system; and that the Governments of Victoria and New South Wales be requested to prepare a plan and submit a draft thereof to the several Governments for consideration." The Governments of these two Colonies are, I understand, still engaged in considering this question; and beyond communicating with the Registrar-General of Victoria, both personally, on occasion of his paying a visit to this Colony at a later period of the year, and by letter in reference to the form of Criminal Statistics suggested in a despatch from the Right Hon. the Secretary of State, but little could be done towards making any alteration in the form of the returns for the past year.

Assimilation
and compar-
ison of Statis-
tics.

As to the desirability of establishing such a uniform system, if it were possible, there can be no question, and every one who has ever attempted to compare the condition in any respect of one country with that of another, must have had practical reasons for admitting it; but I do not believe that it is possible, to any great extent, so to assimilate the Statistics of different countries as to make comparison always safe and easy. For to institute such a comparison, the conditions must be precisely similar, since any difference in the circumstances of either country must vitiate the result. For instance, it is a very common thing to make, or attempt to make, comparisons between the taxation of different countries; and it is frequently assumed that if one, A, pays £10 per head in import duty, and another, B, only £5, A is taxed twice as heavily as B. But there is no greater fallacy than this, as may easily be demonstrated. If exactly the same number of articles are subject to import duties, and the rates of duty are exactly the same in both countries, then it is clear that the one spends twice as much in the purchase of such articles as the other; and it is a fair assumption, since the expenditure is purely voluntary, that A does so because it is twice as wealthy as B. But if we find that A is charged 50 per cent. more *per pound* for its tea and sugar, and 50 per cent. more *per gallon* for its wine, beer, and spirits, and in the same proportion for all other things coming through the Customs, then, and only then, is A taxed more heavily to such extent than B. Thus the rate per head of total Customs duties is no safe ground of comparison as to the burden of taxation, unless taken in connection with the rate of duty on each article. So again, it is utterly misleading to compare the amount paid to the General Government in different countries as a criterion without taking into account the local burdens also. What is borne as a compulsory tax in one country may be paid as a local and voluntary rate in another. For instance, much of that which is raised as a Poor Rate in England, and disbursed by the districts, in Tasmania is borne by the General Government. If therefore we were to compare the figures for the two countries,

without giving due weight to this fact, we should be making a wrong use of them. To take another example: suppose it were desired to compare the public expenditure in Tasmania with that of some other country, say New South Wales. If we were merely to contrast the rate per head in each case, our deductions would be fallacious, because the system of Government is not the same in both cases. The Police and Roads, for example, are maintained in N. S. Wales at the cost of the colony, while in Tasmania, where there are Municipalities, the Police are under their charge and maintained at their expense, but in districts where the people have not taken upon themselves the responsibilities of self-government, they are chargeable to the public purse. But the Municipalities, which might naturally be supposed to bear the whole cost, do not do so, since the State contributes a certain sum in proportion to that which is raised for Police purposes by the districts themselves. In Tasmania, the Roads also are maintained (with the exception of the Main Road) from local funds, subsidised by the State. Now any one who desired to compare the Expenditure either for governmental or local purposes between any two countries so dissimilarly situated in this respect, ought to be aware of all the circumstances, and to admit them as elements in his calculations. It is impossible, therefore, so to frame Statistics as to prevent the danger of making false comparisons. Take again the Criminal Statistics: A larger number of Executions in one country than in another may be attributable, not to a more depraved condition of the population, but to greater severity in the law, since the same offence may be capital in one place and not so in another; and an excess in the number of apprehensions or convictions may indicate, not so much a greater proclivity to crime, as greater efficiency in detecting and punishing it. Nothing less than a special and minute examination of all the circumstances and conditions bearing upon each case can ensure the accuracy of the result. The more experience we acquire in the matter, the more strongly do we feel that Comparative Statistics are a science in themselves; and that to deal with them in a trustworthy manner, requires all the exact accuracy observed in philosophical investigation, in order to eliminate every source of error.

In regard to Population, there are not many discrepant elements, and comparison is tolerably safe. But when we come to the department of Vital Statistics, the first difficulties recur. Thus in regard to Births, there are two special sources of danger to the investigator—First, from births of still-born children; secondly, from defects of registration. Births of the class just mentioned are differently treated in various countries. The returns generally include only “Living Births;” while by the last Report of the Registrar-General of New Zealand for 1872, I find that the practice is there to include among the Births those of still-born infants, and at the same time to register them as Deaths; “thus making,” as the Registrar-General says, “the Birth and Death rate to the Population higher than it would have been if the practice adopted in other Colonies had prevailed here.”

For comparative purposes it is not sufficient, therefore, that the *form* in which the Statistics of different countries are published should be the same: the *principles* on which they are based should also be the same. As long as there are differences in laws, institutions, fiscal systems, habits, productions, such perfect uniformity cannot be obtained; but by united action, such approaches may be made to it as circumstances may admit.

Proceeding now to the subject of the Tables which accompany this Report, we have to deal with

I.—POPULATION.

Population.

This was estimated to have been on the 31st December last—Males, 55,368; Females, 48,849; together 104,217, or 1292 more than at the end of the previous year, the increase being at the rate of 1·25 per cent. For the last three years the increase has been—

	<i>Per cent. of Population at the beginning of the Year.</i>
1873.....	1·25
1872.....	1·12
1871.....	1·01

The centesimal rate of increase by excess of Births over Deaths in those years was—

	<i>Per cent. of Population at the beginning of the Year.</i>
In 1873.....	1·50
1872.....	1·57
1871.....	1·68

The centesimal loss from movement of Population was—

	<i>Per cent. of Population at the beginning of the Year.</i>
In 1873.....	0·24
1872.....	0·45
1871.....	0·67

the actual excess of Departures over Arrivals being—In 1873, 252; in 1872, 462; in 1871, 678.

While, therefore, the gain to the Population by Births is diminishing, the loss by Emigration is also diminishing, and to a slightly greater extent; for while in 1872 as compared with 1871, the falling off in increase from Births was 0·11 per cent., and in 1873 as compared with 1872, only 0·07; the comparative loss by Emigration fell from 0·22 to 0·21 per cent.; that is, the loss was checked by so much.

As to the movements of the people, the Return of Immigration and Emigration now furnished affords more information than did the returns of former years. It shows that an aggregate of 6787 persons arrived in the Colony during 1873, and that 7039 departed from it, the excess of 252 (already referred to) being on the side of the departures. Distinguished in regard to sexes, it appears that 4926 males arrived, and 4591 departed, leaving a gain to the population of 335; and that the number of females was—arrived, 1861; departed, 2448, leaving a loss to population of 587.

Immigration
and Emigra-
tion.

A very large majority of the numbers which appear in this Return is found under the head of Victoria. The largest number of arrivals, after those from Victoria, was from the United Kingdom; then follow New South Wales and New Zealand. Of departures, the greatest number after Victoria was to New South Wales; then, *longo intervallo*, comes New Zealand, the remaining countries taking but a very insignificant proportion.

The number of assisted Bounty Immigrants who arrived in the year was only 28.

Bounty
Immigration.

II.—TRADE, COMMERCE, AND NAVIGATION.

The value of the Imports in 1873 is returned as £1,107,167, being greater by Imports. £299,985, or 27·09 per cent. than in 1872.

The total Imports and rate per head for the last five years was—

<i>Years.</i>	<i>Total Value.</i>	<i>Rate per Head.</i>		
	£	£	s.	d.
1873.....	1,107,167	10	12	5½
1872.....	807,182	7	16	10½
1871.....	778,087	7	12	6½
1870.....	792,916	7	17	4½
1869.....	975,412*	9	12	0¼

Comparing the Imports from the different countries in 1873 and 1872, we find the following increases on the latter year:—

	£
From United Kingdom	120,156
Victoria	136,787†
Queensland.....	5267
South Australia	4215‡
New Zealand	545
Mauritius	43,877
South Seas	4035

On those from New South Wales there was a decrease of £14,717. But in the amount for 1872 was included Coin of the value of £20,000. Deducting this, there would be an increase upon the ordinary articles of about £5000.

* Including Railway Plant, £88,045.

† In 1872, Coin, £20,000 was imported.

‡ In 1872, no Imports.

Exports.

The value of Imports has not been so large in any previous year since 1859.

The total value of Exports in 1873 was £893,556, being a decrease of £17,107 or 1·88 per cent. upon the value in 1872, which was £910,663.

The total value and rate per head for the past five years are shown below—

Years.	Total Value.	Rate per Head.		
	£	£	s.	d.
1873	893,556	8	11	5½
1872	910,663	8	16	11½
1871	740,638	7	5	6½
1870	648,709	6	8	9
1869	826,932	8	2	9½

It appears from these figures that the rate, though lower than in the previous year, was higher than in any of the other four years of the period.

The decrease occurred in the trade with the United Kingdom and Victoria; the former being £84,625, and the latter £2660 less than in 1872. The trade with Guam also showed a reduction of £165.

On the Exports to the other Countries there was an increase, as follows:—

	£
New South Wales.....	32,651
Queensland.....	10,299
South Australia.....	6641
New Zealand.....	16,537

A small trade seems to have been opened up during the year with New Caledonia, Batavia, and New Guinea.

The decrease occurred on Bark, Bran, Gold (£746), Hides, Skins and Leather (£5759), and Wool—the deficiency in the last article being £120,065, which is attributable to the unusually large shipments in 1872, making the comparison with an average year unfavourable for the latter. In the values of most of the other articles exported there was a considerable increase. On Flour it was £4535; on Fruit and Jam, £19,556; on Wheat, £16,838; on Oats, £26,794; on Barley, £751; on Hops, £1871; on Horses, £8889; on Sheep, £47; on Oatmeal, £2146; on Oil, Whale, £645; on Timber, £16,632; and on Vegetables, £1357.

There was a considerable increase in 1873 in the exports of most of our staple articles of produce. Thus, the quantity of Jam was 2,263,266 lbs., being 614,425 lbs. more than in 1872, and 773,326 lbs. more than in 1870. The export of Wheat (253,256 bushels) was the largest in the ten years; that of Oats (448,456 bushels), the largest, with the exception of 1865. The supply of Hops to transmarine markets still advances. The shipments in 1873 amounted to 826,783 lbs., against 697,402 lbs. in 1872, and 72,681 lbs. in 1864; thus in the ten years the quantity had multiplied itself more than eleven times. The export of Gold in 1873 was 3920 ozs., which was somewhat less than in 1872, but larger than in the two previous years. The trade in Sheep for breeding purposes is also reviving. The number of Sheep thus supplied to the other Colonies in 1864 was 1773; in 1865, 3537; in 1868, only 1009, rising to 2890 next year. In 1870 it fell at once to 907; slightly increasing in 1871 to 998, whence, *per saltum*, it rose to 2433 in the following year; and in 1873 stood at 2586. If therefore the last number was not as large as the numbers in some previous years, it shows that the trade is becoming more brisk, and will probably soon be larger than ever before.

In the present returns of Exports of home produce I have included Oatmeal, 218 tons of which were shipped in 1873. The trade in this article seems steadily increasing. In 1864 the quantity exported was but 7 tons. In 1871 it was 148 tons, and in 1872, 140 tons.

In the Timber exported in 1873 there was also a large increase. The number of Palings was the greatest in the ten years, and that of Laths and Shingles was exceeded only during that period in 1864 and 1866, and was more than twice as great as it was in

1867, 1869, 1870 and 1872. The quantity of sawn and hewn Timber was also exceeded only in 1864 and 1871.

The quantity of Wool exported was only 4,243,433 lbs. against 5,998,527 lbs. in the year before. It is impossible to judge of the actual quantity produced in any one year by the exports in that year, inasmuch as part of the clip, more or less, goes with that of the following year. Taking the average of the last three years, (the Scab Act having come into operation in 1870), the quantity was 5,065,560 lbs., and in the three years 1867-9, it was 5,476,578 lbs., or 411,018 lbs. more. This decrease was caused by a diminution in the number of Sheep. In the three years from 1866 (December) to 1869 (March) the average number was 1,727,112: in the three years 1871-3 it was only 1,350,206. In the former period the average weight of fleece would be 3·17lbs.; in the latter 3·75lbs., so that there has been an increase of rather more than half a pound per fleece.

The returns of Shipping show a considerable increase throughout. The total number of ships entered inwards was 661, with a tonnage of 118,353, manned by 7509 hands. The number outwards was 681, the tonnage of which was 119,759, the crews numbering 7697. An attempt seems to have been made during the year to extend our foreign trade, one vessel having been despatched to New Guinea, one to Batavia, four vessels to Guam, and three to New Caledonia. Shipping.

The out-ports show a decrease in the amount of shipping inwards and outwards, except Leith. Torquay has an increase of 9 in the number cleared, but a decrease of 3 in the number entered.

The total of shipping both ways was—number, 1342; tonnage, 238,112; crews, 15,206. Comparing these numbers with those for the previous year we find the increase per cent. was—on the number of vessels, 12·87; on the tonnage, 15·88.

On the number of ships on the registers on 31st December, 1873, there was an increase of 1, and on the tonnage, of 863.

The number of vessels engaged in the Whale Fisheries in 1873 was 18, being 1 less than in 1872, the decrease in tonnage being 152, and in the crews 44. Whale Fisheries.

While, however, only 12 of these vessels were returned as actually employed in Whaling in 1872, the whole 18 were employed in 1873. The produce in the latter year was, Black Oil, 12½ tuns, or 1 tun less than in 1872; Sperm Oil, 558 tuns, or 219 more; the value of both being £44,000, or £16,580 in excess of that for 1872.

The return of Coal raised in 1873 shows an increase at every place except Tasman's Peninsula. The total quantity was 10,147 tons, against 8141 in 1872, the increase being at the rate of 24·64 per cent. I have omitted the prices and value for 1873, as there is considerable difficulty in ascertaining the true value. Coal Mining.

The prices of some articles at Hobart Town such as Coals, Firewood, Oats, Maize, Straw, Timber, were dearer than in 1872; while Malt Liquors, Vegetables, and a few other articles, were cheaper. Prices.

A comparison of the contract prices shows that Barley (Pearl), Butcher's Meat, Butter (Potted), Coffee, Candles (Tallow), Rice, Sugar, Wine (Port), were dearer; while there was a decrease on Bread, Currants, and Flour.

Wages are generally reported to have been higher and labour more scarce in 1873, in consequence of the works on the Main Line of Railway. This, as will be noticed in connection with the agricultural returns, had an unfavourable effect on cultivation. Wages.

The same cause, probably, combined with a brisk emigration to the other Colonies, diminished the number of many of the manufactories and other industries in operation. I notice that, while the Publicans are returned as two less, there appears one Brewery more, at Oatlands, and an addition of three to the Maltsters. Trades and Manufactures.

III.—FINANCE, &c.

The Revenue and Expenditure for the last two years, made up to the 31st March of the current year, are shown in the subjoined Statement of the Assistant Colonial Treasurer:— Revenue and Expenditure.

GENERAL REVENUE, exclusive of Debentures and Expenditure under Loans Acts.

	1872.			1873.

			52,199	13	4	51,332	1	2

WM. H. WINDSOR, Assistant Colonial Treasurer.

Colonial Treasury, 30th May, 1874.

The total revenue from all sources in 1873 was £48,760 1s. 9d. in excess of that received in the previous year. The increase on Customs duties and Bonding Rents was (omitting fractions) £31,531 ; on Inland Revenue, £16,573. There was a small increase on the Land Revenue.

The proportion of Revenue contributed by the Customs was 59·27 per cent.

The total expenditure in 1873 (estimating outstanding liabilities) was £299,995, or £10,993 in excess of that in 1872.

Imperial
Expenditure.

The amount expended by the Imperial Government in 1873 was £36,567 8s. 4d., being £1222 10s. 4d. greater than in the year before.

Exchange.

The Bank rate of Exchange with London was generally higher in 1873 than in the preceding year,—that is, the discount fixed by the Banks on the purchase of mercantile bills was less, and the premium charged on their own bills greater. During the first three months of 1873 the discount on the former was $\frac{1}{2}$ per cent., and for the rest of the year $\frac{1}{4}$; while in 1872, for the first six months it was $\frac{1}{4}$, and for the remainder of the year $\frac{1}{2}$ per cent. Similarly, while in 1873 the premium on Bank bills for the first seven months and the last month was $\frac{3}{4}$, and for the remaining months 1 per cent., in 1872 it was $\frac{3}{4}$ for the first six months and the last month, and only $\frac{1}{2}$ for the remaining five months.

The Exchange with the Colonies continued the same as in the previous year.

In the rates of Discount, the only change was, a reduction of 1 per cent.—from 10 to 9—on bills exceeding 125 days, in the early part of August.

Banks.

The Bank returns, as will be seen from the subjoined synopsis, show a considerable increase of business in the past year. The totals include minor sums which are not of sufficient importance to have separate columns assigned to them.

YEARS.	AVERAGE ASSETS.			AVERAGE LIABILITIES.		
	<i>Specie and Bullion.</i>	<i>Notes, Bills of Exchange, and other Debts due.</i>	<i>Total Assets.</i>	<i>Notes in Circulation.</i>	<i>Deposits.</i>	<i>Total Liabilities.</i>
1873.....	£ 249,030	£ 930,689	£ 1,278,500	£ 97,079	£ 857,524	£ 960,917
1872.....	179,969	942,813	1,196,410	78,376	719,375	808,567

The increase on Specie and Bullion was at the rate of 38·37 per cent. ; on Notes in circulation, 23·86 per cent. ; and on Deposits, 19·20 per cent.

A similar increase is observable in the business of the Savings Banks, as will be seen from the following comparison :—

Savings Banks.

YEARS.	AVERAGE ASSETS.				AVERAGE LIABILITIES	TOTAL.	
	<i>In Mortgages.</i>	<i>In Debentures.</i>	<i>Cash in other Banks.</i>	<i>Total Assets.</i>	<i>Deposits.</i>	<i>Deposits during Year.</i>	<i>Repayments during Year.</i>
1873.....	£ 133,522	£ 89,292	£ 46,081	£ 274,442	£ 244,927	£ 140,906	£ 115,409
1872.....	135,930	88,704	23,778	254,230	226,822	121,059	109,095

The amount invested in Mortgages and Debentures in 1873 was about £1800 less, while the cash deposited in other banks was £22,303 more. This effect is plainly traceable to the following causes:—1. The improved condition of the landowners, enabling them to reduce the incumbrances on their properties; 2. The lowering of the rate of interest on Government loans from 6 to 5 per cent.; and 3. The high premium on Debentures.

To the present return of Savings Banks has been added a statement (compiled from information obligingly furnished to me by the respective Actuaries) showing the number of accounts (not including interest only) open at the end of each half year. From this statement it appears that the Banks had on 28 February, 8937 customers; on 31 August, 9256; and that while in the first half of the year the number of accounts opened exceeded the number closed by 287, in the second half the excess was 319.

The amount of money deposited in the Savings Banks during the year exceeded that in the previous year by £19,847 or 16·39 per cent., while the repayments showed an excess of £6314, or only 5·79 per cent.

Taking the aggregate deposits in all the other banks in 1873, the amount per head of population at the end of the year is found to have been £10 11s. 6½d. The true sum would be somewhat less than this, since a part of the funds of the Savings Banks were deposited in the ordinary banks. In New South Wales the total amount of deposits in 1872 was £17 0s. 6½d. per head.

The number of Post Office Money Orders issued in 1873 was 6572, the amount (omitting fractions) £24,193; the number paid was 5534, the amount £21,108. On the number issued there was an increase of 752; and on the amount, an increase of £3022.

Post Office Money Orders.

The Public Debt of the Colony on the 31 December, 1873, was £1,477,600 (deducting Debentures authorised but not issued £37,800), the rate per head of population being £14 3s. 6½d.

Public Debt.

Closely connected with the subject of the public finances, is that of Gold Mining, which supplies the principal representative of value. This is the next point, therefore, to be considered. The total quantity of Gold produced in 1873 (so far as it could be ascertained) was 4361 ozs., valued at £18,390. On comparing the returns for that and the previous years, we find a large decrease in the number of men employed in alluvial mining, and in the yield of gold therefrom. In quartz mining also there was a decrease of 120 in the number of persons employed, and of about 1800 tons in the quantity of stone crushed; but it is an encouraging feature, that notwithstanding the amount of gold obtained from the stampers was 43 ozs. less, the value is returned as £155 more, the average

Gold Mining.

for the Black Boy gold having risen from £3 17s. 6d. to £3 19s. per oz. But not only has the metal become finer in quality as the depths at which it is worked have increased, but the quartz, as is generally the case, has become richer, the produce per ton at the Black Boy in 1873 being 7 grains in excess of that in 1872—14 dwts. 17 grs. as against 14 dwts. 10 grs.

The alluvial gold fields hitherto worked were of small extent, and were therefore soon exhausted; but there is a considerable quantity of land on private property which, sooner or later, will probably afford occupation for a more numerous mining population. But however this may be, since the commencement of the present year, the large yields from the quartz crushed at the Nine Mile Springs have given a great impetus to mining at that place, and there seems reason to believe that when a sufficient depth has been reached permanent reefs will be found—if they have not already been found—and of a highly remunerative quality.

The reports which the Gold Commissioners have furnished me, contain much valuable and interesting matter, and will be printed as an Appendix to this volume. I shall content myself with giving prominence here to some of the facts which I have gathered from them.

In regard to the operations at Mathinna (or Black Boy) in the Fingal district, it is remarked that the mining community there has now a greater appearance of permanence than at any former time.

The Commissioner has tabulated the yields of the different Quartz Companies and proprietories during the year. I find that from one reef 98½ tons of stone gave an average of 1 oz. 12 dwts. 11 grs. to the ton. The “City of Hobart,” now a well-established Company, from 1590 tons, obtained an average of 1 oz. 2 dwts. 8 grs. per ton. The “Derby” Company from 2116 tons, obtained an average of 9 dwts. 14 grs.; other smaller parcels of stone gave averages of 18 dwts. 13 grs., and 10 dwts. 3 grs. The deepest workings are those of the “City of Hobart” Company, and these do not yet reach, as I understand, much below 250 feet. Experience has shown, so far, that the reef of this Company conforms to the general law, by improving as it descends.

The Commissioner remarks that at Mathinna the figures show, as regards Quartz Mining, an increase under every head in 1873 as compared with 1872.

Writing at a later date, with reference to the George Town and Waterhouse Gold Fields, which had but lately been included in his district, he reports that but little work had been done during the year 1873. Since the beginning of the present year, however, a parcel of about 70 tons of stone at Nine Mile Springs gave an average yield of nearly 8 ozs. of gold to the ton, the gold being of excellent quality. This success has recalled attention to the locality, and the returns therefrom for this year will probably far exceed those of last year.

The Commissioner at the Hellyer gold fields points out the causes which he believes to have led to failure there; and confidently asserts his conviction that gold exists at the Hellyer in considerable quantities. “Upwards of 300 ozs.” he adds, “were last summer obtained from the River Hellyer. Several nuggets have been found, varying from 5 dwts. up to 1 oz. 3 dwts.; but on the whole, the gold is scaly and waterworn.”

IV.—ESTABLISHMENTS, &c. MAINTAINED OR ASSISTED BY GOVERNMENT.

Post Office.

The Post Office is one of the most important institutions of a country; and its records afford much valuable information as to social and commercial questions. A comparison of the postal returns now before us for the years 1872 and 1873 shows that the Colony was making fair progress. The following table will exhibit the result in the clearest light :—

	NUMBER OF LETTERS, &c.		NUMBER PER HEAD OF POPULATION.	
	<i>Received.</i>	<i>Despatched.</i>	<i>Received.</i>	<i>Despatched.</i>
Letters { 1873	1,072,377	1,171,201	10·29	11·24
{ 1872	990,187	1,032,553	9·62	10·03
Packets ... { 1873	35,818	30,932	0·34	0·30
{ 1872	31,393	25,692	0·30	0·25
Newspapers { 1873	668,563	986,167	6·41	9·46
{ 1872	642,104	856,611	6·24	8·32

The public convenience was promoted by the establishment in 1873 of 8 additional Post Offices, extending the post roads by 60 miles.

The estimated revenue of the Post Office in 1873 was £11,500, or £1700 more than in 1872; the expenditure was £16,792 4s. 7d., or £2270 11s. 1d. in excess.

The number of Messages sent by the Electric Telegraph within the Colony in 1873, was 29,507, or 21·65 per cent. in excess of the number in 1872; the number of Messages by the Submarine Cable was 9774, or 30·09 per cent. in excess. Electric Telegraph.

The Return of the working of the Launceston and Western Railway also shows a favourable result. The number of passengers conveyed increased by 19,276, or 30·29 per cent.; the tonnage of goods by 7172, or 39·60 per cent.; the total revenue by 3457, or 25·35 per cent.; while the Expenditure was reduced from £13,786 9s. to £13,651 14s. 1d. There was thus a profit over and above the working expenses in 1873 of £3441 13s. 1d. Launceston and Western Railway.

The receipts of the Marine Boards were also in excess of those of the previous year by £3179 5s. 0d. The Light-houses, which are under the charge of the Marine Board at Hobart Town, produced a larger revenue by £392 2s. 4d. Marine Boards.

I refer to the next Return—that of the Expenditure of the Salmon and Trout Breeding Establishment—only for the purpose of showing the result of its operations during the year. With this view the following statement has been furnished by the Secretary to the Salmon Commissioners:— Salmon Breeding Establishment.

RETURN showing the distribution of OVA and FRY from the BREEDING PONDS, RIVER PLENTY, during the Year ending 31st December 1873.

OVA.	
Salmon Trout—Launceston	300
New Zealand	300
Victoria	200
Brown Trout—New South Wales	250
Hobart Town	100
Victoria	2300
New Zealand	600
TOTAL OVA	4050
FRY.	
Brown Trout—Hobart Town*	500
Ditto*	700
River Styx	100
River Plenty	200
TOTAL FRY	1500

During the Year 120 Licences to fish for Trout were issued, producing a revenue of £80 15s. 0d., and a sum of £30 was paid into the Treasury for sale of Ova to New South Wales.

Since the year 1868, there have been distributed by the Commissioners for the purpose of stocking the rivers of this and the Australian Colonies and New Zealand, 32,800 ova of the Brown Trout, 2850 ova of the Salmon Trout; 32,049 fry of the former, and 1621 fry of the latter. Many of the rivers of Tasmania are now swarming with these fish, which, in a few years, ought to produce a considerable addition to the public revenues.

The gross cost of the Penal and Charitable Establishments in 1873 (including grants to Institutions under private management) was £53,048. The amount received in diminution of the expenditure was £6714, or 13·29 per cent. of the cost of the Establishments wholly maintained by the Government. This sum does not include produce consumed by, or services performed for, the inmates themselves. Penal and Charitable Institutions.

Of the net cost of these Establishments, £36,713 9s. 4d. was chargeable to the Colony, and £9620 14s. 2d. to the Imperial Government. In addition to this charge on the Colonial funds, a sum of £8812 12s. 4d. was expended in relief of out-door paupers.

The average number of inmates throughout the year was—Offenders under punishment and their children 668, of whom 72·6 per cent. had been Imperial convicts;

* For distribution in the Rivers south of Hobart Town, and on the East Coast.

Paupers 1265, of whom 60·9 per cent. had been of that class ; and 388 Insane and Idiots, of whom the proportion was 56·9 per cent. In the whole, there were 55 of these burdens on the State fewer than in 1872.

As compared with that year, there was also a decrease of cost on these Establishments to the Imperial Government of £801 18s. 3d., and to the Colony of £2148 10s. 4d.

Road Trusts.

The Road Trusts seem to have participated in the general improvement. The extent of roads brought under their control was increased by 90 miles; their revenue (£2005 being from Rates, Tolls, &c.) by £2869. Their expenditure however was less than in 1872 by £1075 4s. 7d.

Municipalities.

The Municipalities of Hobart Town and Launceston appear to have been in a somewhat more flourishing condition than in the previous year, since the assessed value of property and the amount of revenue were greater. Putting the Government grant out of the question, the same may be said of the Rural Municipalities.

From these Returns we gather the following facts relating to local taxation. In Hobart Town the rates were 3s. 1½d. in the £; in Launceston, 3s. 3d. On the basis of last Census (7 February, 1870) the amount per head of population would be—Hobart Town, 16s. 2¾d.; Launceston, 15s. 8¾d. The population for the Rural Municipalities not having been distinguished in the census tables, we have no means of ascertaining what the rate per head was in them.

Valuation of Property.

The assessed value of property in 1873, as shown by the Valuation Rolls, was in excess of that of the previous year by £1062, the amounts being £601,538 and £600,476 respectively.

V.—CROWN LANDS.

Land Sales.

The following table shows the Sales of Crown Land in 1872 and 1873 :—

Description of Land.	No. of Lots.		Area.*		Proceeds of Sale.*		Average Price per Acre.	
	1873.	1872.	1873.	1872.	1873.	1872.	1873.	1872.
			ACRES.*	ACRES.*	£	£	£ s. d.	£ s. d.
Country lots	282	303	41,652	25,782	43,288	29,993	1 0 9¼	1 3 3
Town and Suburban lots	92	57	483	383	3519	1891	7 5 8	4 19 0
TOTAL	374	360	42,135	26,165	46,807	31,884	—	—

The Town Sales show an increase both in number of lots and area, and also in the average price; but in regard to the Country Sales, while the area was much larger, the number of lots and the average price were less. The increase in quantity was principally upon lots of 500 acres and upwards, the area of which was nearly four times as large as in 1872, being 4475 and 24,360 acres respectively.

The amount produced by sales of Crown land in 1873 was larger by £14,923, or 46·8 per cent., than in 1872.

The average price for town and suburban lots was higher by £2 6s. 8d., while that of country lots was lower by 2s. 5¾d.

Grants leased.

The extent of Crown Land under lease in 1873 was less than that in the previous year by 8591 acres, and the rental produced was £649 6s. 7d. less. But as it is stated in a note by the Deputy Commissioner of Crown Lands that 79,196 acres heretofore held under the "Quiet Enjoyment" tenure had fallen in, the decrease is easily accounted for.

Gold Fields.

We have already seen, when speaking of the produce of the Gold Fields, that there was much less activity in alluvial mining last year in consequence of the limited extent of available ground having been nearly worked out. From this cause we are prepared to find a considerable decrease in the amount of land occupied for gold-mining purposes. Thus the number of Miners' Rights issued and in force in the year was only 198 as against 810 in 1872; Gold Mining Leases applied for, 4 for 52 acres, instead of 5 for 69½ acres; Leases executed, 2 for 13½ acres, instead of 10 for 146½ acres; while the

* Fractions omitted.

amount of money received declined from £831 15s. 9d. to £476 1s. 9d. The leases in force at the end of the years 1873 and 1872 were 17 and 26 respectively, with aggregate areas of 301½ and 473½ acres.

Notwithstanding these unfavourable comparisons, the prospects of Quartz Mining becoming a profitable and permanent industry were perhaps never better than at present; though alluvial mining must always, in this Colony, occupy a very subordinate place.

Other Minerals excited a much larger share of attention in the past year than in previous years; the number of Leases for mining purposes having been 29 with an area of 1997 acres against 8 in 1872 with an area of 565 acres. Of the former number 20 were for Iron, 5 for Tin, 1 for Copper, 2 for Coal, and 1 for Lime. The amount of rental received in 1873 was in excess of that in 1872 by £381 17s. 6d. Mineral Leases.

In regard to the Agricultural and Live Stock Returns, I regret to say that in spite of every possible exertion to accelerate their completion, they could not be published this year before the 13th July, although last year they appeared in the *Gazette* of the 24th June. The delay arose from two causes. A part of the police force having been withdrawn from the greater number of the districts, for urgent temporary service in the Launceston and Western Railway District, such withdrawal was urged in one or two instances as an excuse for delaying the returns beyond the usual time; and those for Oatlands, which were the last received, were kept back by an unfortunate misunderstanding arising from a total change of Warden, Council Clerk, and Superintendent of Police, in consequence of which the work of collecting information was not begun until a considerable time after the 31st March had elapsed. Agricultural and Live Stock.

In order to hasten the collection, after ascertaining the opinions of the Wardens and Police Officers, I had supplied the Collectors with Schedules corresponding to the householders' schedules used for Census purposes, leaving it to their discretion to use them or not. Some have reported favourably of the plan; and I hope, that by this means in future years, the returns will be completed somewhat sooner. A difficulty was felt in some cases from the carelessness and indifference of those to whom they were sent, in not returning them; but this is an evil which, as long as human nature is what it is, will always be more or less felt.

Directing our attention now to the returns in detail, we find in the total extent of land under cultivation a decrease of 7328 acres, and in that in crop a decrease of 1615 acres. The reports of the Collectors assign as a reason for this declension, the scarcity and high price of labour, causing the holders of land to occupy themselves less with tillage, and more with the rearing of stock. In Wheat there is a decrease of 3780 acres; in Oats of 623; in Turnips, Carrots, and Mangel Wurzel, of 1654; in Hay, of 6862; in Gardens and Orchards, 265; in Fallow land, 3611; in all other cultivated land, of 3576. In the quantity of new land broken up there is a decrease of 1441 acres; and in land under rotation of crops a decrease of 5372. There are increases in the following:—Barley, 689 acres; Pease 318; Potatoes, 397; Hops, 3; Green Forage, 319; Permanent Pastures 1474.

The falling-off in the acreage in crop of course affected the produce in a proportionate degree.

In the average produce, there is a general falling-off, as compared with the average of 1872-3, caused (if we may take the meteorological observations at Hobart Town as a criterion for the whole Colony) by a smaller rain-fall in the months of May, June, August, October, November, and December—the three latter being just those when, on account of the warmth of the atmosphere, moisture has the greatest effect on vegetable life.

The average of the principal Crops for the last three years is shown below.

YEARS.	Wheat.	Barley.	Oats.	Pease.	Potatoes.	Mangel Wurzel.	Hay.	Hops.
	Bushels.	Bushels.	Bushels.	Bushels.	Tons.	Tons.	Tons.	Lbs.
1873-4	15·66	20·14	20·78	14·78	3·17	11·07	1·15	718·56
1872-3	17·63	23·04	25·00	20·85	4·21	12·72	1·44	1053·24
1871-2	14·09	18·20	19·93	14·15	2·88	11·08	1·10	786·45

It will be seen that the average was better than that of 1871-2, except in the case of Hops (the difference as regards Mangel Wurzel is not worth noticing), in which the serious decrease at Launceston from 1600 lbs. to 458 lbs., is attributed to the dryness of the season and the absence of means of irrigation.

The highest yield of wheat returned, in 1872-3, was 25·26 bushels per acre, which occurred in the district of Longford. This was exceeded in 1873-4, the average for the district of Hobart being returned as 26·23 bushels. At Brighton, Clarence, Franklin, Kingborough, Richmond, Sorell, Spring Bay, all on the South or East, the Wheat Crop seems also to have been better.

It is encouraging to observe that the acreage of Wheat reaped by machine increased from 2389 in 1872-3 to 5728, or very nearly double, in 1873-4. In view of the difficulty of obtaining manual labour so severely felt in the last season, it is of the utmost importance to encourage the use of machinery; and it is greatly to be wished that the Agricultural Societies would direct their attention more earnestly to this point.

The prices of agricultural produce were generally higher in 1873-4 than in the previous year. The averages, as regards the principal products, were—In 1873-4: Wheat, per bushel, 5s. 2½d.; Barley, 5s. 1d.; Oats, 3s. 11d.; Potatoes, per ton, £4 3s.; Onions, £12 16s.; Hay, £4 10s.; Hops, per lb., 1s. 5d.; Apples, per bushel, 3s. 11d.; Peas, 3s. 8d. In 1872-3: Wheat, 4s. 7½d.; Barley, 4s. 11½d.; Oats, 2s. 8d.; Potatoes, £3 2s. 7½d.; Onions, £5 19s. 9d.; Hay, £3 5s.; Hops, 1s. 4d.; Apples, 3s. 6½d.; Pears, 3s. 1½d.

In Agricultural Machinery there seems to have been a very remarkable increase; and this is the most encouraging indication of progress in agriculture that I have yet observed. The difficulty of obtaining labour, which was so keenly felt during the year, will not only not be more than a temporary inconvenience, but will prove a positive and lasting benefit, if it leads the employers to adopt the use of machinery, by which manual labour is economised and profits increased. If South Australia, with an average yield of not much more than half that of Tasmania, can grow grain at a profit, the latter ought, in the open lands, to be far better able to make agriculture a remunerative industry.

The increases in Machinery were—Clod Crushers, 9; Cultivators (horse), 33; Corn Crushers, 19; Hay Elevators, 37 (10 by steam); Hay Rakes, 23; Horse Hoes, &c., 59; Mowing Machines, 6; Ploughs, subsoil, 28; Reaping Machines, 13; Reaper and Mower combined, 21; Seed Drills, 6; Sowing Machines, 2; Threshing Machines, 19, one being driven by steam. The double-furrow plough is coming into use in several districts.

Live Stock.

The number of Live Stock, with the exception of Horses and Goats, on 31 March 1874, was in excess of that in 1873. At the former date there were—Horses, 22,612; Horned Cattle, 106,308; Sheep, 1,490,746; Pigs, 59,628. The increase being—Cattle 1714, or 1·639 per cent.; Sheep, 95,393, or 6·84 per cent.; Pigs, 5701, or 10·57 per cent.

The returns furnished by the Inspectors of Stock at Hobart Town and Launceston of Live Stock imported and slaughtered at the public abattoirs in 1873 and 1872, show the numbers in those years to have been—

		1873.	1872.	INCREASE.
Sheep	{ Imported	13,238	4915	8328
	{ Slaughtered	60,230	49,427	10,803
Cattle	{ Imported	921	828	93
	{ Slaughtered	8839	8261	578
Pigs	Slaughtered	4657	4872	—

VI.—LAW, CRIME, &c.

Commitments.

The number of persons committed for trial in 1873 was 125, being two more than in 1872. Of these 55·2 per cent. were persons who had previously been always free.

Persons tried by Superior Courts.

The number tried in the superior Courts was 101, of whom 75 were convicted, and 26 acquitted. Forty were offenders against the person, and 61 against property. There was a decrease of 7 persons tried, as compared with 1872, and of 4 as compared with 1871. The number convicted, while 7 less than in 1872, was greater by 1 than in 1871.

By Magistrates.

The cases dealt with magisterially were, however, considerably more numerous than in the previous year. The number being 7308 against 6321, the increase being at the

rate of 15·61 per cent. From 1867 to 1872 there was an uninterrupted decrease in these cases; and some unusual cause must therefore have operated to occasion so unexpected an increase. This is doubtless to be found in the introduction of a large number of labourers for the purposes of the Main Line Railway Company. Many of these men proved turbulent and refractory, and frequently came under the cognisance of the law, chargeable with offences against social order or against their employers. Thus as might be expected, under such a state of things, there was an increase in the cases summarily dealt with, of 750, and in those of drunkenness, of 234. The increase in the number convicted was 504, or 12·18 per cent.

There have been no Executions since 1870.

Executions.

Inquests were held on 156 persons, namely, 116 males, and 40 females. In 1872 the number was only 139, but in 1871 it was 161; in 1870, 152; and in 1869, 158. Verdicts of suicide or self-murder were found in 7 cases, being in excess of the average of the preceding five years, which was 6·2 per annum.

Inquests.

The returns relating to Litigation in the Supreme Court, in its "Small Debts" Jurisdiction, and Courts of Requests, show the following aggregate result in 1873:—Number of summonses issued, 2543; of cases tried, 1606; amount of claims sued for, (omitting fractions), £13,277; amount of verdicts obtained, £6317; number of writs and warrants issued, 558. As compared with the previous year, there was a decrease of 748 in the number of summonses; of 402 in the cases tried; of £3732 in the amount sued for; of £2427 in the amount awarded; and of 5 in the number of writs and warrants.

Litigation.

The Supreme Court in its ordinary jurisdiction issued 182 writs of summons during 1873, and tried 19 civil causes. The writs were fewer by 88 than in 1872; but there was an increase of 5 in the number of causes tried.

Probates of Wills were granted in 1873 to the number of 65, the value of the property being sworn under £101,741; besides 20 Letters of Administration relating to property to the value of £9,947. These figures show the following increases:—Probates, 6, value £41,767; Letters of Administration, 4, the value of the property in the last case being however £13,621 less in 1873 than in 1872.

Probates, &c.

The business of the Courts under the Bankruptcy Act in 1873 was very trifling as compared with the two former years. Only 7 Petitions in Bankruptcy were presented; and the same number for liquidation by arrangement. Upon these 7 persons were declared bankrupt, and 6 had their estates put into the hands of Trustees.

Bankruptcies.

For the last three years, since the present Act came into force, the numbers were—

Years.	Petitions in Bankruptcy.	Petitions for Liquidation by Arrangement.	Total Petitions.
1873.....	7	7	14
1872.....	13	35	48
1871.....	9	16	25

The decrease is very remarkable; the total number in 1873 being little more than half that in 1871, and less than one-third of that in 1872.

The number of Mortgages effected in 1873 under both systems, was 367. The value of the property being £229,411. Comparing these figures with those for the previous year, we find a decrease of 10 in the number, but an increase of £69,321 in the value.

Mortgages.

The transactions registered at the Lands Titles' Office in the last three years were—

Lands Titles
Office.

Years.	Number.	Value of Property.	Area of Property.
		£	ACRES.
1873.....	960	221,764	118,370
1872.....	710	162,681	118,927
1871.....	691	214,515	107,202

In the number and amount of Bills of Sale registered in 1873, there was a considerable decrease; the number being 151 against 173; the amount, £59,752, against £92,680.

Bills of Sale.

Deeds, &c.
registered.

On the contrary, there was an increase of 56 on the number of Memorials, Judgments, and Certificates of Satisfaction registered; and of 234 in the number of Deeds enrolled in the Supreme Court.

Inquests.

The Inquests on persons were more numerous than in 1872, the numbers being 156 and 139 respectively. Of the former, 116 were on females, and 40 on males. Verdicts of murder or manslaughter were returned in 3 cases, against 6 in 1872; of death by excessive drinking in 1 case, against 4 in 1872. Suicide found 7 victims (4 males and 3 females) in 1873, and 6 in 1872.

VII.—EDUCATION, RELIGION, &c.

Public
Schools.

The Returns relating to Public Schools shew that the number of Schools in 1873 was 141, or 2 more than in 1872; that the number of distinct Scholars on the Rolls during the year was 10,803, or 824 more; the average number on the Rolls, 7047, or 109 more; the average number in daily attendance, 5268, or 44 more; the number who entered during the year 3851, or 210 more; the number who left, 2707, or 31 more. In the number of Teachers of all kinds, including paid Monitors, there was a decrease of two in 1873.

The total expenditure from the Treasury on account of these schools in 1873 was £12,272 8s. 1d., or £101 19s. 3d. in excess of that for 1872. The amount received from parents in school fees was £4340 0s. 8d., or £486 14s. 9d. more than in that year.

The amount of government aid per annum for each scholar, calculated on the average number in daily attendance, was £2 7s. 8½d.

Council of
Education.

The amount disbursed by the Council of Education in the maintenance of two Scholars at British Universities, and in relation to the Degree of Associate of Arts, was £636 9s. 11d.

Exhibitions.

On Exhibitions tenable at the higher Schools, awarded by the Council and Board of Education, there was expended the sum of £562 5s. 7d.

Friendly
Societies.

The returns of Friendly Societies filed with the Clerks of the Peace show that the number of members at the end of 1873 was 2179, and the capital £12,501 5s. 7d.; the receipts during the year £5039 13s. 6½d.; and the expenditure, £3673 9s. 7d.

As compared with the figures of the preceding year, there was an increase in the members of 647; in the capital of £2219 18s. 9½d.; in the receipts, of £1176 19s. 6d.; and in the expenditure of £942 5s. 5d.

The number of societies which filed returns has, however, always fallen short of the number in existence. The Friendly Societies Act, 19 Vict. No. 26, requires that the Trustees or other Officer of every society registered under that Act shall file a statement in a prescribed form every year before the 1st February; and enacts that the Trustees shall be incapable of prosecuting any action at law or in equity until such statement shall have been filed. In many cases the requirements of the Act in this respect are habitually disregarded; and it is well that the attention of trustees of such societies should be pointedly called to the fact, that so long as they neglect them, they are at the absolute mercy of any dissatisfied member who chooses to appeal to the law. It is for the interest of the members also to take care that the office-bearers comply with the provisions of the Act.

VIII.—VITAL STATISTICS.

Births.

The number of Births registered in 1873 was 3048, namely, Males, 1512, Females, 1536—being 35 more than in 1872. On the births of Males in 1873 there was a decrease of 15; on those of Females an increase of 50. The ratio of Males to Females was as 98·44 to 100. This excess in the births of female children is very remarkable. I can only find three other instances in the published Statistics of the Colony, namely, in 1839, 1841, and in 1852.

The ratio of Births to population was 29·24 per 1000,—less by 0·03 than in 1872.

Deaths.

The number of Deaths registered in 1873 was 1504—namely, Males, 896; Females 607; and 1 sex unknown. There was an increase upon those of 1872 of 93.

Adding to these 1504 deaths those (8) of Convicts under punishment at Port Arthur, not registered, making the whole number 1512, the death-rate for 1873 is found to be

14.51 per 1000, being 0.66 above the average (13.85) of the five years (1868—73) and 0.75 above the rate in 1872.

The ratio of deaths per 1000 of each sex living at the end of the year 1873 was—Males 16.18; Females 12.43.

On examining the ages of those who died during the last two years, we find that the children under one year of age were 40 less in 1873; from 1 to 5 years, 15 more. From 10 to 40, the number was 58 more; from 40 to 80, 43 more; and from 80 upwards, 19 more. Thirteen Males and six Females between 90 and 100 died in 1873, and only 6 of each sex in 1872. So that the past year seems to have been especially unfavourable as compared with the other, to adult and declining life.

The ratio of Deaths of both sexes at each age are 100 Deaths of Males and Females for 1870* and 1873 is shown in the following table:—

AGES.	MALES.		FEMALES.	
	1873.	1870.	1873.	1870.
<i>All Ages.</i>	100.00	100.00	100.00	100.00

Ninety years und upwards	1.45	1.26	0.99	—
Not specified	0.22	0.23	0.17	0.19

Seven cases of Scarlatina were registered in 1873 in excess of those in 1872. Of Diphtheria 28 persons are certified to have died in 1873, and only 1 in 1872.

The high rate of mortality in 1873 as compared with 1872, appears to have been caused mainly by the increase (54) in the deaths of old people. Under the Class of Developmental Diseases, there were altogether 100 deaths registered in 1873 in excess of those in the previous year.

The other Classes do not present any remarkable variations.

Croup, Influenza, and Catarrhs, Rheumatism, Bronchitis, Pleurisy, Enteritis, Nephria, were much more fatal in 1873 than in 1872, and so were Atrophy and Debility—the latter principally among children. On the other hand fewer deaths were caused by Whooping Cough, and Diarrhoea, and by Fevers.

The number of cases of disease treated in the General Hospitals at Hobart Town and Launceston, in the Hospital at Campbell Town, and at the Queen's Asylum for Destitute Children in 1873 was 2000, and the Deaths 166. On the 'Cases,' as compared with those of the previous year, there was an increase of 313, and on the Deaths, of 2.

Diseases and
Deaths in
Government
Institutions.

Scarlatina was very prevalent; so were catarrhal affections, diseases of the respiratory organs, and rheumatism. Under the head of "other zymotic diseases" there was an entry of 163 cases, against only 1 in the preceding year! In the Class of Zymotic, or fermentative diseases, altogether there were 195 more cases, and 18 more deaths than in 1872. Skin diseases and accidents were also more numerous. Four cases of attempted suicide by poison were treated in the two principal Hospitals, all of which recovered.

In the other Government Establishments there was an increase of 419 in the cases treated, and of 34 in the deaths.

* This year is selected for comparison because the ratios are already calculated, which has not been done for the intervening years.

There were no Vaccinations performed at any of the Hospitals during the year.

Marriages.

The number of Marriages in 1873 was 659, against 632 in 1872,— an increase of 27.

The ratio of Marriages to population in 1873 was 6·32 per 1000, and in 1872, 6·14. The average rate for the last five years was 6·31 per 1000.

Meteorology.

The table of Meteorological observations at Hobart Town shows that the mean height of the Barometer during the year was 29·903; temperature, 58·43; daily range of thermometer, 21·64; solar intensity, 93·60; terrestrial radiation, 39·36; humidity of the air, 0·68; rainfall, total for the year 23·43 inches; monthly mean, 1·95; number of days on which rain fell, 157; mean in each month 13·08; mean force of wind in each month, 77·50 lbs. per inch.

Atmospheric pressure was less than in 1872; the temperature higher on the whole, and higher also in the months of February, April, May, June, August, October, and December, but lower in the remaining months; daily range somewhat lower; solar intensity 0·30 higher; radiation lower; humidity of the air 0·03 less; total rainfall 8·33 inches less, (equal to about 4½ months fall in 1873), monthly mean 0·7 inch less; number of days on which rain fell only 3 fewer, monthly mean 0·25 less. The dryness of 1873 therefore was caused, not so much by the infrequency of rain as by the scanty supply. Wind-force was nearly the same as in 1872*, but 19·13 lbs. per inch above the 30 years' average.

With a drier atmosphere, and violent north-westerly winds in the months of September and October—just the time when the warm still weather is most required for the process of vegetation—it can easily be understood why the average produce of the soil was so much below that of the preceding year.

IX.—MISCELLANEOUS.

Political Franchise.

The only circumstance under this head which it is necessary to mention is, that the number of Electors for the Legislative Council on the Rolls after revision was 2805, or 14 more than in 1872. In the Electors for the House of Assembly there was also an increase of 38, the number for the past year being 14,039.

Conclusion.

Taking a general survey of the foregoing facts, we find more matter for congratulation than has appeared for many years past. There was, it is true, still a drain of population; but those who remained found better employment. Trade was brisker, commerce more enterprising, the revenue rising, capital accumulating, the means of inter-communication, (Post Office, telegraph, and railway) more extensively used; the public lands in greater demand; and the incumbrances on property relieved.

The mineral wealth of the Colony is becoming better known, and the rich deposits of Tin cannot fail eventually to prove a source of large profit. Quartz mining has been proceeding steadily at the Black Boy, and has started into fresh vigour at the Nine Mile Springs in consequence of renewed discoveries there. Slate quarries have been opened, and slates of marketable quality produced. Little, however, seems to have been done towards utilising the stores of coal and iron with which the Colony abounds; but I believe that efforts have been successfully made by the Tasmanian Charcoal Iron Company to bring English capital to bear on the manufacture of the latter. This seems to be the only way in which these minerals can be profitably worked; the capital required being larger, and the skill greater, than local resources can supply.

It is doubtless an unfavourable circumstance that the quantity of land under cultivation was less, but the chief cause was one that will soon pass away; and on the other hand, if the area was less, more intelligence was brought to bear upon it.

I have the honor to be,

Sir,

Your most obedient Servant,

E. C. NOWELL, *Government Statistician.*

* A correction is required in the Table for 1872, by inserting wind-force for May, 86·66, which makes the total 811·89, and the monthly mean 77·66.

Authority under which levied, or by which legalised.	Specification of Taxes, Duties, Fees, &c.	Authority under which originally established.	At what Period.
34 Vict. No. 2.	<p>NOTE.—The purchase or consideration money is to be truly expressed and set forth in words at length in or upon every such principal or only deed or instrument of title or conveyance.</p> <p>And where any lands or other property of different tenures or holdings, or held under different titles, contracted to be sold at one entire price for the whole, shall be conveyed to the purchaser in separate parts or parcels by different deeds or instruments, the purchase or consideration money shall be divided and apportioned in such manner as the parties shall think fit, so that a distinct price or consideration for each separate part or parcel may be set forth in or upon the principal or only deed or instrument of conveyance relating thereto, which shall be charged with the said <i>ad valorem</i> duty in respect of the price or consideration money therein set forth.</p> <p>And where any lands or other property contracted to be purchased by two or more persons jointly, or by any person for himself and others, or wholly for others, at one entire price for the whole, is conveyed in parts or parcels by separate deeds or instruments to the persons for whom the same is purchased for distinct parts or shares of the purchase money, the principal or only deed or instrument of conveyance of each separate part or parcel shall be charged with the said <i>ad valorem</i> duty in respect of the sum of money therein specified as the consideration for the same. But if separate parts or parcels of such lands or other property are conveyed to or to the use of or in trust for different persons in and by one and the same deed or instrument, then such deed or instrument shall be charged with the said <i>ad valorem</i> duty, in respect of the aggregate amount of the purchase or consideration moneys therein mentioned to be paid or agreed to be paid for the lands or property thereby conveyed.</p> <p>And where any person having contracted for the purchase of any lands or other property, but not having obtained a conveyance thereof, shall contract to sell to any other person, and the same shall in consequence be conveyed immediately to the sub-purchaser, the principal or only deed or instrument of conveyance shall be charged with the said <i>ad valorem</i> duty in respect of the purchase or consideration money therein mentioned to be paid or agreed to be paid by the sub-purchaser.</p> <p>And where any person having contracted for the purchase of any lands or other property, but not having obtained a conveyance thereof, shall contract to sell the whole or any part or parts thereof to any other person or persons, and the same shall in consequence be conveyed by the original seller to different persons in parts or parcels, the principal or only deed or instrument of conveyance of each part or parcel thereof shall be charged with the said <i>ad valorem</i> duty in respect only of the purchase or consideration money which shall be therein mentioned to be paid or agreed to be paid for the same by the person or persons to whom or to whose use or in trust for whom the conveyance shall be made without regard to the amount of the original purchase money.</p> <p>And in all cases of such sub-sales as aforesaid the sub-purchasers, and the persons immediately selling to them, shall be deemed and taken to be the purchasers and sellers within the intent and meaning of the provisions of this Act relating to the <i>ad valorem</i> duties on conveyances on the sale of property thereby imposed.</p> <p>But where any sub-purchaser shall take an actual conveyance of the interest of the person immediately selling to him, which shall be chargeable with the said <i>ad valorem</i> duty in respect of the purchase or consideration money paid or agreed to be paid by him, and shall be duly stamped accordingly, any deed or instrument of conveyance to be afterwards made to him of the property in question by the original seller shall be exempted from the said <i>ad valorem</i> duty, and be charged only with the ordinary duty on deeds or instruments of the same kind, not upon a sale.</p> <p>And where any lands or other property separately contracted to be purchased of different persons at separate and distinct prices shall be conveyed to the purchaser, or as he shall direct in and by one and the same deed or instrument, such deed or instrument shall be charged with the said <i>ad valorem</i> duty in respect of the aggregate amount of the purchase or consideration moneys therein mentioned to be paid or agreed to be paid for the same.</p> <p>And where any lands or other property shall be sold and conveyed in consideration wholly or in part of any sum of money charged thereon by way of mortgage or otherwise, and then due and owing to the purchaser, or shall be sold and conveyed subject to any mortgage, bond, or other debt, or to any gross or entire sum of money to be afterwards paid by the purchaser, such sum of money or debt shall be deemed the purchase or consideration money, or part of the purchase or consideration money, as the case may be, in respect whereof the said <i>ad valorem</i> duty is to be paid.</p>	27 Vict. No. 38.	24 Sept. 1863.

Authority under which levied, or by which legalised.	Specification of Taxes, Duties, Fees, &c.	Authority under which originally established.	At what Period.	
34 Vict. No. 2.	<p>And to prevent doubts respecting what shall be deemed the principal deed or instrument of conveyance in certain cases, it is declared :</p> <p>That where upon the sale of any annuity or other right not before in existence the same shall not be created by actual grant or conveyance, but shall only be secured by bond, warrant of attorney, covenant, contract, or otherwise, the bond or other instrument by which the same shall be secured, or some one of such instruments if there be more than one, shall be deemed and taken to be liable to the same duty as an actual grant or conveyance.</p> <p>And where there shall be several deeds, instruments, or writings for completing the title to the property sold, such of them as are not liable to the said <i>ad valorem</i> duty shall be charged with the duty to which the same may be liable under any general or particular description of such deeds, instruments, or writings contained in <i>The Stamp Act</i>.</p> <p>And where in any case not hereby expressly provided for of several deeds, instruments, or writings a doubt shall arise which is the principal, it shall be lawful for the parties to determine for themselves which shall be so deemed, and to pay the said <i>ad valorem</i> duty thereon accordingly ; and if necessary the other deeds, instruments, or writings on which the doubt shall have arisen shall be stamped with a particular stamp for denoting or testifying the payment of the <i>ad valorem</i> duty upon all the deeds or instruments being produced and appearing to be duly stamped in other respects.</p> <p>And where there shall be duplicates of any deed or instrument chargeable with the said <i>ad valorem</i> duty, one of them only shall be charged therewith, and the other or others shall be charged with the ordinary duty on deeds or instruments of the same kind not upon a sale, and on the whole being produced duly stamped as hereby required, the latter shall also be stamped with a particular stamp for denoting or testifying the payment of the said <i>ad valorem</i> duty.</p> <p><i>Exemptions from the preceding Duties on Conveyances upon the Sale of Lands, &c.</i></p> <p>All transfers of Debentures of the Colony.</p> <p>All leases except so far as the same may be in consideration of any fine or forgift.</p> <p>All grants and conveyances of Waste Lands of the Crown.</p> <p>All duplicates of instruments under <i>The Real Property Act</i>.</p> <p>All transfers of any Mortgage to the Trustees of any certified Friendly Society.</p> <p>Declaration of Use or Trust in writing, not being a Deed or Will</p> <p>Deed.—For every deed and for every certificate or document of title under <i>The Real Property Act</i>, where not subject to <i>ad valorem</i> duty under <i>The Stamp Act</i></p> <p>Exemption.—Every deed upon which <i>ad valorem</i> duty is payable, and duplicates of instruments under <i>The Real Property Act</i>.</p> <p>Denoting Stamp or Certificate as in <i>The Stamp Act</i> mentioned</p> <p>Draft or Order on a Banker for the payment of any sum of money</p> <p>And the following instruments shall, amongst others, be deemed and taken to be Drafts or Orders for the payment of money within the intent and meaning of <i>The Stamp Act</i>, and shall be chargeable accordingly with the Duty imposed by <i>The Stamp Act</i>; viz.—</p> <p>All documents or writings usually termed Letters of Credit, or whereby any person to whom any such document or writing is or is intended to be delivered or sent shall be entitled or be intended to be entitled to have credit with, or in account with, or to draw upon any Bank for or to receive from such Bank any sum of money therein mentioned.</p> <p><i>Exemptions.</i></p> <p>All Drafts or Orders for the payment of money charged with any Duty other than the above.</p> <p>All Drafts and Orders for the payment of money to the bearer or order on demand drawn by or upon any Savings' Bank.</p> <p>All Drafts or Orders for the payment of money drawn by the Colonial Treasurer, or by the Registrar of the Supreme Court, or any Clerk of the Peace for the payment of sums ordered to be paid by them for Jurors and Witnesses' expenses.</p>	£ s. d.	27 Vict. ^a Licence Fee. ^b Including £10 for previous year. ^c Stated by the Trust in last Returns as £83 5s. 1d. in error. ^d Including £296 9s. from Bank, and £5 advanced by Collector on account of Rates.

^e Subsidy for year 1872. ^f Balance as per last Return, £9. The difference is explained to have been caused by amount of uncollected Rates. ^g Error of 1s. in balance given in last Return.

* Private property and crown land respectively.

The balances for and against the Trusts are denoted by the signs plus (+) and minus (—) respectively.

[Compiled from Returns furnished by the Respective Trusts.]

E. C. NOWELL, *Government Statistician.*

^a Differs slightly from the balance in the previous Returns, but stated to be the correct balance.

^b Including £21 19s. arrears of 1872.

^c Police and Municipal respectively.

^d Police and Road Rate respectively.

^e In last Return the balance to 1873 was stated to be + £18 11s. 7d.; the Return now appears to have been incorrect, the true balance being — £18 11s. 7d.

^f On Private Property and Crown Lands respectively.

^g Police and Municipal respectively.

The balances for and against the Municipalities are indicated by the signs *plus* (+) and *minus* (—) respectively.

The Area was supplied by the Survey Department.

[Compiled from Returns furnished by the Wardens.]

E. C. NOWELL, Government Statistician.

MEMO.—The Returns hitherto furnished of the Area of Crown Land under Rental have, for many years past,* shown a considerable excess beyond the actual quantity under lease. It is difficult now to account for the very great discrepancy; but it may have arisen, in some measure, from the fact that, after the annual Returns are made up, lists of persons who have failed to pay rent are received from the Colonial Treasury, and they have not been taken into consideration when the Returns for the following year have been prepared.

* Up to, and including, 1866.

RETURN of County Lots of CROWN LAND sold during the Year 1873.

[Compiled from Returns obtained through the Mayors of Hobart Town and Launceston.]

E. C. NOWELL, Government Statistician.

*REPORTS, or Extracts from Reports, of Collectors of Agricultural Statistics,
1873-4.*

BOTHWELL.

I HAVE the honor to enclose Stock and Crop Returns, and which to the best of my belief are correct.

I find that there are no important changes in the agricultural portion of the District; the yields upon the whole are satisfactory.

There has been an increase both in Cattle and Sheep since last year, which as a rule appear to be in sound condition.

With regard to the Schedules, I have used but two of them, nor do I think people generally care to use them; the remainder of them I return.

T. PERKINS, *Collector.*

BRIGHTON.

1. No new Productions.
2. No improvements in mode of cultivation.
3. No underground drainage by tiles or otherwise.
4. No improved kinds of Machinery or Farm Implements have been brought into use. A decrease in employment has taken place, in consequence of labor being so high.
5. No improvements in breed of Live Stock and getting up Wool, &c.

Twenty-four of the Schedules have been returned correctly filled up; they seem to answer better than was expected.

CHARLES WRIGHT, *Collector.*

CAMPBELL TOWN.

By this post I have the honor to forward the Agricultural and Live Stock Statistics for this Municipality for the year ending 31st March, 1874.

I have but little to report respecting the Agricultural Returns, as no more is grown in this District than what is required for home consumption, and I therefore omit any remarks under heads 1, 2, 3, and 4 further than to state that there is very little variation from the Returns of last year; nor is it probable, from the nature of the soil, that any considerable amount of agriculture will ever be carried on in the District.

The Apple Crop shows a decided improvement, as compared with that of last year, whilst that of Pears is considerably less.

With respect to the Returns of Live Stock, those of horses, cattle, and sheep all show a slight decrease in number; but the improvement in the breeding of sheep still progresses steadily, and the Messrs. Gibson and Taylor have again realised handsome profits by the sale of pure sheep in the neighbouring colonies, and a considerable number of farmers are now paying more attention to this important and profitable occupation.

T. H. POWER, *Collector.*

CLARENCE.

In my report of last year I referred to the prevalence of rust, and that the yield of wheat would have been greater only for this pest; its effect upon the wheat crop has not been so great this year, hence the yield is considerably larger.

The low prices obtained by farmers for their produce for the year ending 1873 prevented many from cultivating to the extent of former years; as a consequence the acreage of wheat, oats, and hay in the accompanying returns show a decline.

In connection with the collection of the Stock and Crop Returns, I have mentioned to several farmers the differences where they occur, arising in the acreage and the produce of the same, comparing one ear with another, as ascertained from your published returns; and have come to the conclusion in my own mind that if a Farmers' Club was formed in each District, however simple in its working, it would be productive of much good. The farmers could then collectively confer upon the very important, to them, information contained in your Statistics.

I hope you will not consider it out of place in my writing this.

F. PEDDER, *Collector*.

DELORAINÉ.

IN forwarding the Agricultural and Stock Returns for the year ending 31st March, 1874, I have much pleasure in reporting that, owing to the increase in the prices of grain, &c., agriculture has proved more remunerative this year than of late, although the average yield is less than that of last year.

Nothing new in the shape of "Machinery" has been introduced here during the past year.

EDWARD WILLIAMS, *Superintendent of Police*.

EVANDALE.

I HAVE the honor to forward herewith the Stock and Crop Returns for this Municipality. I have made use of several of the Schedules, and have found them a great help, several persons having land in this, but living in the Longford Municipality,—one of which, you will perceive, had given a Return there before he received the Schedule forwarded by me. I may add that I have found no difficulty in getting them properly filled and returned. I have enough left to serve me another year, and will preserve them for that purpose. I don't think I can say much in favour of any improvement in this district; it is about in the same state it has been in for several years past. Fair prices have been ruling for nearly all agricultural productions, Hay in particular fetching a very high price at present, considering there has been a fair average crop.

R. MARRIOTT, *Council Clerk and Superintendent of Police*.

FINGAL.

COMPARED with the previous year, the Return I send you shows a decrease in almost every item, the exceptions being, in Agriculture, a small increase in the acreage and yield of mangels; and, in Stock, an increase in the number of sheep of 7328 this year over 1873.

The crop of Potatoes is very deficient, owing chiefly to frost in the early part of the season, and to dry weather in the latter part.

The return of Wheat, &c. (from the smaller settlers especially) is in many cases very small, so much so that many items appear as if they were only the yield per acre and not the total produce; but after enquiry I have found the return correct, the deficiency in most cases being caused by the grub or caterpillar, which has also been very destructive on many of the grass lands. I am unable to report any new productions or improved methods of cultivation during the year.

Irrigation Works.—There are only two farms in the district where irrigation is carried on to any extent, viz.,—"Ormley," (S. H. Grueber), where the water is conveyed two miles through the bush in an open drain, and about half-a-mile of drains through the fields and gardens; and at "Kingston," (Falkiner's), there are about four miles of drains, by which the water from the South Esk is made to flow over the meadows. At "Henbury," (Mr. Storey's), there are remains of considerable irrigation works, but they have been allowed to get out of repair and are not used. I have not returned the irrigation works mentioned in the list of machinery, &c., as there was not space to particularize them.

The "Printed Schedules," sent to facilitate the collection of the returns, I have found of *very great service*, especially when the proprietors were absent or ill, and they have generally been correctly filled up, but I do not think it would be possible to obtain a correct return by employing them alone. Many are quite unable to fill them up, and others are careless in returning them, but considered as a *help* to the Collector they are very valuable.

WILLIAM K. MORRIS.

FRANKLIN.

AGRICULTURAL and Live Stock Returns herewith. The employment of myself and others of the Police of the district at Launceston in the early part of the year accounts for the delay in furnishing the same. I think they compare favourably with previous years.

With reference to the "Schedule" sent here to be forwarded to each producer, I considered that the attempt to collect the Statistics by this method would, owing to the delay as before stated, still further retard the collection, as I feel confident that the system of sending to each producer a schedule to fill in would in no way answer in the Huon District.

I therefore only distributed the forms in a few instances and to a few intelligent individuals, and in only one solitary instance did I receive a return. I was therefore compelled to adopt the usual system, viz., a house to house visitation; and I am still strongly of opinion that trusting to the producers themselves to furnish the information would only result in a loss of time and labour. Of course it may be tried another year under more favourable circumstances.

JOHN LAMBERT, *Collector.*

GEORGE TOWN.

I HAVE the honor to forward for your information the Agricultural and Live Stock Returns for the year ended 31st March, 1874. I must also express my regret that they have been so long delayed, the reason being that they were not commenced at the usual time, owing to my absence in Launceston on special service (assisting to collect the Railway Rate). I was thus employed for two months: hence the delay in collecting the necessary information to enable me to furnish the returns.

You will perceive there is not a very material difference in the acreage under cultivation for last year and the present, but as a general average the yield has not been so satisfactory as the last: this was no doubt in consequence of the unusually dry weather during the early part of this year.

There is a slight increase in Sheep and Horned Cattle, but a considerable falling off in the number of Horses, which is accounted for by the high prices ruling for forage in this district.

THOS. H. SIMPSON,
Collector of Agricultural and Live Stock Statistics.

GLAMORGAN.

I AM of opinion that the Schedules are of great importance in facilitating the collection of the returns, and would strongly recommend you to continue to supply the various Collectors with Schedules next year.

ALFRED JOHN AMOS, *Collector.*

GLENORCHY.

I REGRET I am unable to forward a very favorable report as to the improvements in this locality, the larger proportion being small farmers, and the prices of this past year have not been a sufficient inducement to cultivate a larger area; but the opportunity of employment on the Main Line Railway Company's works has induced them to turn their attention that way, bringing in a supply of the needful for their immediate wants more speedily, and has of necessity thrown out of cultivation a portion of that which had been under crop formerly. There are a few who are making considerable improvement in the mode of cultivating, especially in the Orchards and Hop-grounds; the scarcity of labour, and that of such a very inferior description, has prevented many contemplated improvements being carried out. The season has not been a favorable one generally, therefore they have not realised the benefits calculated upon. As regards the crops generally, they do not come up to the past year in quantity.

The quantity of machinery has very considerably increased, no doubt occasioned by the scarcity of labour; and that will have its good effects, many will have proved the expedition in storing their crops, which will enable them to calculate how far they may venture for the future.

The quantity of sheep and cattle kept in this district is very limited, therefore does not afford me any opportunity for remark.

I may here remark that I think the plan of sending the separate Schedules would likely answer well in many districts; but so far as this district is concerned the advantage would be very limited, from the inability of the parties to fill them up to be depended upon. I should say not more than ten copies would be required.

THOS. H. BILTON.

GREEN PONDS.

THE land sown with Wheat in this Municipality in 1873 was about the same area as that sown in 1872, but in consequence of the destruction caused by rabbits in some parts of it, there was between 400 and 500 acres not reaped at all. The yield of wheat in 1874 is about $2\frac{1}{2}$ bushels per acre less than in 1873, which was caused partly by the wet winter and in part by blight and rabbits. The deficiency in the quantity of Oats was caused principally by rabbits. The only Hop-grower in the Municipality has grubbed up his Hop-ground, labour of the sort required being scarce and too high.

There are about 1000 acres less in crop than in 1873. There is a decrease of nearly 1800 acres of English-grass land, caused by the land having been laid down so long that the grass has run out; that land is now included under "Other Cultivated land." A great deal of "Other Cultivated land" in the Return for 1873 has been thrown open to the bush land.

Machinery in connection with agriculture is very little used in this Municipality, only four acres having been reaped by a machine during this year.

The area under Crop is growing less every year, several large properties being used solely for depasturing sheep; and other proprietors intend following the same pursuit, as being more profitable than cultivating the land. As a rule there is no improvement in the mode of cultivation; in nearly all cases it is simply a succession of the same sort of crop, without manure.

THOS. W. STANWIX, *Collector.*

HAMILTON.

I HAVE the honor to report for your information in reference to the following queries mentioned in your Memorandum of Instructions relative to the Collection of Statistics of this District; viz.:—

- (1.) New Productions.—None. (2.) Improvements in Cultivation, &c.—Same as previous year. (3.) Drainage under ground, &c.—None. (4.) Machinery and Implements, &c.—About same as previous year. (5.) Improvements in Breed of Stock, &c.—None.

In consequence of the beneficial effect of the Scab Act, the sheep of this District look very healthy, and have a greater per centage of increase and a heavier clip than previous to the Act coming into operation. This is a large pastoral District, with but a small area under cultivation, but which has increased within the last few years.

I find that the Circular Schedules have assisted me much in arriving at correct information.

R. TIMMINS, *Superintendent of Police.*

HORTON.

HEREWITH the Collector of Stock and Crop for Horton presents his account, with his compliments, to the Government Statistician. He has sent no special report accompanying the Statistics, as there appeared to be nothing new worth remarking in the condition of the District. Neither the Railway works nor the Mineral discoveries appear to have made any change in the rates of labour or the general condition of the District.

A. J. O.

KINGBOROUGH.

1st. There have been no new Productions.

2nd. There has been no improvement in the mode of Cultivation. Rotation crop-growing has not come into practice. There has been but little fallowing. Artificial manures have not been used to any extent, and manuring has, as a rule, been confined to the use of that from the yards and piggeries.

3rd. There has been no underground Drainage.

4th. No improved kinds of Machinery have been brought into use.

5th. A slight improvement has been going on in the Breed of Cattle.

6th. Dairy produce and small-Fruit growing occupy the chief attention of the farmers. The Schedules supplied for the purpose of expediting the collection of the Statistics have been partially made use of; but, generally speaking, persons either did not understand them or did not care to be troubled to fill them up, and the information was principally obtained in the mode formerly observed.

E. INNES,
Collector of Agricultural Statistics for Kingborough.

LAUNCESTON (SELBY).

HEREWITH I have the honor to forward returns of Stock and Crop for Selby and Launceston, and in doing so would draw your attention to the fact that in Oats there is a decrease, owing to the Government having withdrawn for sale between two and three hundred acres of land on the Launceston Swamp, formerly leased to private persons, and on which there has been no cultivation this year. There is a slight increase in Wheat and Barley to that of last year. There is a decrease in artificial Grasses, owing to the ravages of the caterpillar. There is a decrease in Hay, owing to some of the land being laid down in English Grass. In Apples there is an increase, owing to the ravages of the grub being less destructive this year than last. Other things are nearly equal, with the exception of Sheep, in which there is an increase.

JAMES PROPSTING, *Collector.*

LONGFORD.

IN forwarding you the Agricultural and Live Stock Returns for this District, I wish to inform you that there are few or no perceptible changes to bring under your notice since last year's report. At the commencement of the season the rains set in earlier than usual, and the latter part quite the reverse, with a long continued drought, which must account for the decrease in the quantity produced in 1874, compared with that of 1873.

1st. The only new production is an American Beetroot, good as fodder for cattle or pigs, which at present is but little known.

2nd. The chief Manures used in this District are Guano and Bone-dust, the latter in small quantities compared with the former.

3rd. Underground Drainage in one or two instances, as a trial; the result at present am unable to judge.

4th. No change to report since last year.

5th. A great deal of attention is being paid by most of the flock-owners throughout the District in improving the breeds of Sheep of all kinds.

I have also to add that the printed forms furnished by you have been in many cases of great assistance.

J. EAST, *Superintendent of Police.*

NEW NORFOLK.

I HAVE no change in the mode of cultivation to report; and although not presuming to be a competent judge in agricultural matters, I believe that, with a few exceptions, farmers do not in general in this locality show much skill in the management of their farms, partly perhaps for want of capital, and partly from uncertainty of tenure.

It is otherwise with the generality of those who follow Hop-growing,—they would seem to be steadily improving in their mode of cultivation. The hop crop shows a decrease from that of last year, owing to an unfavourable season, to the appearance of the spider, and to heavy winds, which made great havoc in some grounds, especially where the poles were old; there is likewise a decrease in the acreage.

I have nothing to report as to underground Drainage, very few farmers following that system.

In Machinery, there is a double-furrow Plough, and a water-power Lift for irrigation, by means of a wooden wheel thirty-eight feet in diameter, with buckets attached to the circumference, and placed in the River Derwent.

The season as a whole has been unfavourable, some crops being very short, especially the late ones.

Referring to the Forms of Schedules, I have had considerable difficulty in getting on with them,—some persons mislaying them, others putting them aside and forgetting them until reminded by the Collector; and one individual refused altogether to give any return, although he did so last year. Notwithstanding his refusal, I believe I have been able to furnish a tolerably accurate return of his stock and crop from another source: perhaps the plan might work better next time.

I am sorry that I could not send in my return earlier, but it was out of my power, as I was delayed to the very last by parties promising and then neglecting to keep their promises.

J. STEVENSON, *Superintendent of Police.*

OATLANDS.

I REGRET being so much behind with the Stock and Crop Returns, but I can assure you it is no fault of mine. In the first place, it was very late when I received instructions to collect; and again, I have had a great deal of trouble to get in the Schedules sent to the different settlers to be filled up and returned to me. After waiting some considerable time, I had to go for them; in several instances had to go more than twice, and only got the last two on the 1st instant (July). Some of the Districts had finished, or nearly so, when I received orders to collect.

No new productions of any kind, excepting that James Lord, Esq., has discovered Coal in large quantities on his estate at York Plains, close to the Railway Line, and is now getting men at work opening out the mine.

There is not any improvement in the mode of cultivation. A great falling-off in the quantity of grain and other agricultural produce, caused by the want of labour and high wages, and the best men having left the farms to work on the Railway. All descriptions of Farm Produce are high in price in consequence.

A number of Farms are not worked at all, but turned into Sheep-runs,—which, with the high price of wool, has caused a great increase of sheep. There is a marked improvement in the breed of sheep and cattle, particularly sheep. Leicester sheep have been selling at extreme rates for some time past. Fat stock of all descriptions command ready sale at high rates.

Draining is finding favour with many farmers and graziers in the low lands and marshes. The past season has been a favorable one for the farmers and graziers.

G. NICHOLS, *Collector.*

PORT SORELL.

I HAVE the honor to forward herewith the Agricultural Returns for the District of Port Sorell, and have at the same time much pleasure in drawing your attention to the great increase in the agricultural interest generally for the present year. In Machinery also rapid strides are being made; and I am able with pleasure to assure you that, in every case where it has been possible to employ it, the satisfaction and profit have been universally admitted.

You will observe that the agriculturists are now devoting more attention to the raising of Stock and improvement of Grasses, and that more land has been fallowed than usual this year; and this, coupled with the large prices realised at a recent stock sale at Latrobe, has had the effect of making that branch of the agricultural interest in this District very prosperous indeed. Over £1800 was realised at the sale.

Through the energy of John Henry, Esq., of the firm of Cummings, Henry, and Co., River Don, an Agricultural Show has been got up, which will take place at the Don on the 29th April; and from the interest taken in the various parts of the District, and the promises made by parties disposed to compete for the several prizes, it is probable that it will be a most excellent affair for the District. It is the first effort at competition here amongst agriculturists; and as it has been started by manufacturers who have themselves alone contributed £20 to the funds, it is to be hoped that its good effect will be properly appreciated, and its continuation periodically established.

I may add in conclusion that, although in some cases, owing to the extraordinary drought of the season, the yield of produce has fallen short of expectations and former periods,—yet, owing to the competition in buying and consequent good prices, interests generally on the Coast have risen to a most satisfactory condition for all classes of the community.

Skilled labour is very scarce indeed in all its branches, and an increase of 2s. a day upon former quotations for wages can but with difficulty procure the class of labour required. Ship-building especially is flourishing on the Coast, and we are about to have steam communication established between the Don and Victoria and Adelaide.

J. REYNOLDS, *C.D.C.*

RICHMOND.

HEREWITH I beg to transmit returns of Stock and Crop, &c. I have not observed any improvements worthy of remarking upon. You will perceive there is a large increase in the quantity of Sheep in this District over last year. Skilled agricultural labourers are very much in demand; the work on the Main Line of Railway has withdrawn a considerable number of the already limited supply of agricultural labourers.

J. GRIFFITH.

ROSS.

I HEREWITH beg to forward Agricultural and Live Stock Returns to 31st March, 1874, for District of Ross. You will find that the crops are not so good as the previous year; we had a scarcity of rain during the growing season. We have 12,700 more sheep this year to be accounted for. Several of the stockholders have increased their flocks, and some few do not return quite so many as last year.

The Apple Crop was very good, but Pears a failure. Cattle and Pigs have increased, but the return of Horses is somewhat less. No new productions or improvements in mode of cultivation, &c.; the area of land suited for agriculture is small, the district consisting principally of pastoral lands. Some marsh lands have been drained, much increasing the value for fattening purposes. No fresh Machinery or farm implements brought into use.

I am not aware of any improvements in breed of Live Stock, getting up Wool, &c. Warm-water washing for sheep before shearing is most in use in this district.

W. E. WARNER,
Collector of Agricultural and Live Stock Returns.

SORELL.

THE total produce of Wheat exceeds that of last year by 11,895 bushels, whilst the acreage is 324 less. The Barley crop may be considered a fair one on the whole, considering the extent of the district; in some parts 40 bushels to the acre, other parts 10,—giving an average of 11 bushels to the acre. The Oat crops may be considered fair, the acreage being less.

The quantity of Peas exceeds that of last year, the difference of acreage being 171 acres more. The same remark applies to the Bean crops. The acreage of Potatoes only exceed that of last year by 17, whilst the number of tons are 133 more. In Turnips, less acreage by 2, while the increase of the produce is 56 tons. Of Mangel Wurzels I cannot report so favourably, the produce being less for the number of acres.

The Hay crop is less; which accounts for the Wheat crop being more, as a good deal last year was cut for Hay, on account of the rust, which pest has entirely disappeared. In Apples an increase of 1181 bushels. The whole of the crops are better than previous year's, also the prices.

Sheep, Pigs, horned Cattle, and Horses have increased; Goats about the same.

ROBT. J. HARRIS, *Superintendent of Police.*

SPRING BAY.

HEREWITH I have the honor to forward Return of Crop and Stock, &c., which I trust will be found correct. You will perceive there is a slight decrease in the number of acres in cultivation, as compared with last year, thereby leaving the amount of produce less. This is in a great measure attributable to a large amount of land having lapsed into a state of nature. With few exceptions, the root and grain crops have been bad, owing to a dry season. There is one very bad mode of cultivation practised on some farms in this district, that is, a succession of the same description of crop on the same land. I am sorry to say that the Schedule forwarded to some producers, to be filled up by them, has not met my expectations.

S. MURPHY, *Collector.*

WESTBURY.

HEREWITH I have the honor to forward Agricultural and Live Stock Returns for year ending 31st March, 1874. In doing so I regret to report the decrease under the head of every item in agriculture, which I attribute to the unprecedented dry season. The most noticeable is in Wheat and Oats. There is an increase in the acreage of the former compared with last year, with a decrease in the yield of 53,036 bushels; in the latter, increase in acreage, 903,—decrease in yield, 35,598 bushels.

However, there is a bright side to look at; prices are better, pastoral interests are good. Stock of every description are in good demand. More attention is paid to improve the breed of stock, with satisfactory results. The decrease in Sheep and Cattle, compared with last year, is not very large. I attribute the decrease to the number exported to other Colonies, where remunerative prices are obtained.

Your comments on my report of last year, in reference to drainage, are good and to the point; the hints thrown out to landlord and tenant by you, if adopted, would be of mutual benefit. There are thousands of acres in this and other districts that, if drained, would carry double the number of sheep and cattle.

The use of Reaping and Mowing Machines are a great saving to the farmers. The land becoming more clear of timber, double-furrow ploughs are more in use, thereby effecting a saving of one man and horse. Fallowing the land during the summer is a good preparation, and attended with good results.

Dairy produce has been in fair demand, giving the farmer a fair profit. In Pigs there is an increase of 1040 compared with last year. A great many are exported to Melbourne from this and other districts.

There is very little in the way of Minerals to report. There are some good freestone quarries in this district; and, as our Railway becomes more in use, I have no doubt a market will yet be obtained for it. The Ilfracombe Iron Mines are in this district, and are at a standstill at present. I understand that a new company is formed, who are expected to work them with advantage and profit. There is an abundance of limestone and no lack of timber on the property. The working of this and other mines in the vicinity of Ilfracombe will give employment to a great many of our native youth who feel disposed to work.

I hope the returns are not too late; every farm has been visited and care taken to obtain correct information. The Schedules were very acceptable and facilitated the work of the Collectors; about forty forms for this district will be sufficient.

MYLES MAHONY,
Collector Agricultural Statistics for the Municipality of Westbury.

APPENDIX B.
REPORTS OF GOLD COMMISSIONERS.

FINGAL GOLD FIELDS.

Commissioner's Office, Mathinna, 28th February, 1874.

SIR,
I HAVE the honor to forward the Table of Gold-mining Statistics for the Fingal District, for the year 1873.

Population.

For the first six months of 1873 the population decreased rapidly, and on 30th June the numbers were—

Men	142
Women.....	72
Children	112
TOTAL.....	326

The decrease was principally owing to the falling off in the yield of alluvial gold, and the high rates of wages offered to miners on the Main Line Railway works. In the last half of the year, however, the population slightly increased again, in consequence of the large number of men employed in quartz mining; and on 31st December, 1873, there were—

Men	167
Women.....	75
Children	131
TOTAL.....	373

The average number of men employed in gold mining throughout the year was about 125, of whom some 30 were alluvial miners, and 95 quartz miners; and there were some 25 men on an average employed in the public-houses, stores, and other places of business, and as splitters, carters, &c.

The population are as a rule quiet and well conducted; and nearly all the men are employed at good wages, and many of them married and have families. The settlement at Mathinna has now a greater appearance of permanence than at any previous period.

There is a large and flourishing Public School under the Board of Education at Mathinna, and Church of England, Roman Catholic, and Wesleyan services are held periodically.

A Lodge of Good Templars has also been recently opened, but the rules of the Order do not appear to be very rigidly enforced.

The health of the people is very good, and the mining population have also enjoyed a remarkable immunity from serious and fatal accidents.

Alluvial Mining.

This branch of industry has continued to decline, and reached a very low point in the month of December, when there were only some half dozen Europeans and the same number of Chinese regularly employed. Shortly before Christmas, however, a little more activity was displayed, and a few of the miners are now said to be doing very well. I do not think, however, that this will be more than a temporary revival. I estimate the yield of alluvial gold for 1873 at about 450 ounces, value £1778—but it is impossible to obtain an accurate return of the amount of alluvial gold raised during the year. If the miners were enabled to follow the Reedy Marsh alluvial lead, through the private property of the owner of the Malahide Estate, into the deep ground along the course of the South Esk River, a gold field might be opened which would give employment to a large mining population; but I despair of any steps being taken to test the value of the South Esk Valley Lead unless a Company with ample capital can be formed to give a fair trial to what offers, from all the indications, a far better prospect of success than many of the schemes which are from time to time so eagerly adopted by the public.

Quartz Mining.

The following Table will show the results for the year :—

CLAIM.	Tons of Quartz crushed.	Gold obtained.			Value.	Yield per Ton.		
		ozs.	dwts.	grs.		ozs.	dwts.	grs.
City of Hobart	1590	1776	9	0	7017	1	2	8
Ditto, North Reef.....	50	6	0	0	24	0	2	10
Ditto, Tailings..	55	7	2	0	27	0	2	14
East City of Hobart.....	17	15	15	0	62	0	18	13
Britannia	35½	11	12	5	46	0	6	8
Derby.....	2116	1012	14	10	4000	0	9	14
Caledonian.....	22	10	3	0	40	0	9	5
Glencoe.....	10	4	19	0	20	0	9	22
Golden Gate	42	14	18	0	58	0	7	2
White Boy.....	98½	160	10	0	634	1	12	11
Yellow Boy (mixed)... ..	60½	26	8	0	104	0	8	7
Champion (mixed)	41	20	15	0	82	0	10	3
Fingal (Mangana)	47	14	1	0	56	0	6	0
TOTAL.....	4184½	3081	6	15	12,170	0	14	17

The figures for 1872 were as follows:—Tons Quartz crushed, 3388; Gold, 2350 ounces; value, £9106; average, 13 dwts. 21 grs. per ton. It will thus be seen that there is an increase under every head in 1873 as compared with 1872.

The Derby Company averaged from 35 to 40 men, and the City of Hobart Company from 25 to 30 employed throughout the year. The numbers upon the other claims varied considerably, and on many claims work was altogether suspended from time to time from various causes.

It will be noticed that one crushing took place at Mangana during the year at the old Fingal Company's claim, which is now in private hands.

The crushings from the Yellow Boy and Champion Claims were supplemented by surface quartz collected in various localities to make up the crushings, and I have therefore marked these crushings as "mixed."

It is a matter for regret that the excellent results obtained from quartz mining in this district have not more greatly stimulated mining enterprise; but it seems that no genuine returns have that attraction for the outside public that is exercised by transparent swindles; and, as a rule, the less chance the public have of obtaining a return for their investments the greater is their anxiety to invest. It is more than likely therefore that mining enterprise may be starved out of this very promising gold field; the returns from which have been seldom equalled except in the richest districts in Victoria, unless matters take a speedy turn for the better.

No improvement has been made in the Gold Fields Act or Regulations during the past year, and the many defects of the Act of 1870 still remain unremedied.

I have, &c.,
A. K. CHAPMAN, *Commissioner.*

The Government Statistician.

GEORGE TOWN GOLD FIELDS.

Hobart Town, 3rd June, 1874.

SIR,
I HAVE the honor to enclose the Statistics of the George Town Gold Fields for 1873, compiled from all the information available to me at present.

Very little appears to have been done at Nine Mile Springs during the year 1873, with the exception of some alluvial mining; and at Waterhouse no work whatever appears to have been performed.

In February of the present year, however, some seventy tons of quartz, which previous tests had proved to be very rich in gold, were crushed at the "Excelsior" Battery, Nine Mile Springs; and as the result was an average yield of nearly eight ounces of gold to the ton of quartz, the gold itself being of excellent quality, a large amount of attention is at present directed to gold-mining at Nine Mile Springs, and those concerned are sanguine as to the result of the work at present in progress leading to the development of a rich and permanent Gold Field.

I am, &c.,

A. K. CHAPMAN, *Commissioner.*

E. C. NOWELL, *Esq., Government Statistician.*

HELLYER GOLD FIELD.

*Gold Commissioner's Office, Wynyard,
8th January, 1874.*

SIR,
IN accordance with your wish, I beg to furnish you with a short report on the condition of the Hellyer Gold Field on 31st ultimo.

In the beginning of the year 1873, the Chinese population, amounting to some 37, left the River Hellyer to proceed to the Nine Mile Springs, where some of their countrymen were reported to have hit on good ground. None of the Chinese have since returned. It is an acknowledged fact in Victoria that the Chinese make very bad pioneers on any newly discovered gold field, and this has been borne out in the present instance. Had the Chinese resorted to the gullies and terraces, at some little distance from the river, where the Europeans have found all the largest and best gold, no doubt they would have been very successful; but they could not be induced to leave the river, giving as the reason the fear they have of being lost in the dense scrub which abounds on both its banks. The Chinese adopted the method of "paddocking," as it is called; viz.,—the running of a double row of logs out into the stream and filling up the interstice with clay; they then form a kind of enclosure or paddock, some 20 or 30 feet wide by 50 long; these they form in succession along the banks. This paddock they bale out, and then proceed to strip off the silt to the bare rock, which they "cradle." Unfortunately the most likely portions of the river were taken up by the Europeans, and were never subjected to the ingenious method pursued by the Chinese; and consequently the bed of the river has not been tested.

Two parties, in all about eight or ten men, worked for some time (after the Chinese left) in the terraces, and made very good wages; but owing to their not possessing the means to provide rations, without earning them from day to day, they were unable to prospect the country for any distance from the river, and upon the wet weather setting in in April or May, they were compelled to leave. Nearly all the men forming those two parties are about to proceed to the Hellyer again, three of their number having left this morning; and if the ground is fairly prospected this summer, I have no doubt the result will be more than satisfactory.

The exceedingly steep and rough nature of the country in the vicinity of the Hellyer renders the task of prospecting very difficult, and nothing short of a rush to the locality, on the part of practical men, will ever properly develop the golden resources of the Hellyer and Arthur Rivers. That the precious metal does exist there in large payable quantities admits of no doubt whatever in my mind, and time alone will establish the fact.

Upwards of 300 ounces of gold were last summer obtained from the River Hellyer. Several nuggets have been found, varying from 5 dwts. up to 1 oz. 3 dwts., but on the whole the gold is scaly and water-worn.

I am, &c.,

ARTHUR B. WILLIS, *Commissioner Hellyer Gold Field.*

E. C. NOWELL, *Esq., Government Statistician.*
